Luminar TechnoLab | Calicut
(MEARN Stack)   June-2023

Gained valuable web development experience through diverse projects.
- Ecommerce Website Development
- Restaurant Website Development
- Travel Website
- Portfolio Website

ACADAMIC PROJECTS

RECYCLE WORLD

In this project, I played a key role in establishing a system for the collection of recyclable items from our customers. I utilized a technology stack that included Angular for the frontend, Node for the backend, and Xamp as the database solution.

HEALTH CARE FOR EPIDEMIC DISEASE

In our project, we successfully implemented a patient health record management system that effectively curtails the misuse of medications while simultaneously reducing the reliance on paper-based record-keeping
